

PAVING STONE BORDER

CALCULATION SHEET FOR HOLLAND 4x8 | COBBLE 4.5x7 | ROMAN EURO 6x7

SOLDIER COURSE

1. Calculate the total lineal footage around the perimeter.
2. Convert lineal feet into inches by multiplying by 12.
3. Divide the inches by the **width** of the stone being used.
4. Deduct soldier course pieces from total square feet of project.
5. To change soldier course into square feet divide the total pieces by the number of pieces per square feet.

RUNNER COURSE

1. Calculate the total lineal footage around the perimeter.
2. Convert lineal feet into inches by multiplying by 12.
3. Divide the inches by the **length** of the stone being used.
4. Deduct runner course pieces from total square feet of project.
5. To change runner course into square feet divide the total pieces by the number of pieces per square feet.

CALCULATION EXAMPLES

To pave a patio sized 16' x 40' (640ft²)

HOLLAND 4x8

$$16 + 16 + 40 + 40 = 112 \text{ lineal feet}$$

$$112 \times 12 = 1,344 \text{ inches}$$

$$1,344 \text{ divided by } 4 = 336 \text{ pieces}$$

$$336 \text{ divided by } 4.7 = 71.5 \text{ ft}^2$$

COBBLE 4.5x7

$$16 + 16 + 40 + 40 = 112 \text{ lineal feet}$$

$$112 \times 12 = 1,344 \text{ inches}$$

$$1,344 \text{ divided by } 4.52 = 297 \text{ pieces}$$

$$297 \text{ divided by } 4.7 = 63 \text{ ft}^2$$

ROMAN EURO 6x7

$$16 + 16 + 40 + 40 = 112 \text{ lineal feet}$$

$$112 \times 12 = 1,344 \text{ inches}$$

$$1,344 \text{ divided by } 6 = 224 \text{ pieces}$$

CALCULATION EXAMPLES

To pave a patio sized 16' x 40' (640ft²)

HOLLAND 4x8

$$16 + 16 + 40 + 40 = 112 \text{ lineal feet}$$

$$112 \times 12 = 1,344 \text{ inches}$$

$$1,344 \text{ divided by } 8 = 168 \text{ pieces}$$

$$168 \text{ divided by } 4.7 = 35.7 \text{ ft}^2$$

COBBLE 4.5x7

$$16 + 16 + 40 + 40 = 112 \text{ lineal feet}$$

$$112 \times 12 = 1,344 \text{ inches}$$

$$1,344 \text{ divided by } 6.77 = 199 \text{ pieces}$$

$$199 \text{ divided by } 4.7 = 42.3 \text{ ft}^2$$

ROMAN EURO 6x7

$$16 + 16 + 40 + 40 = 112 \text{ lineal feet}$$

$$112 \times 12 = 1,344 \text{ inches}$$

$$1,344 \text{ divided by } 7 = 192 \text{ pieces}$$

$$192 \text{ divided by } 3.52 = 54.5 \text{ ft}^2$$
