Heavy Lifting Apparatus

Lifts up to 3500 pounds

Safely turns any forked machine into a pallet crane in seconds!

Boulder Buddy

The BOULDER BUDDY is the product you've been asking for! It's the safe, smart and simple solution for moving large rocks and boulders. Perfect for landscapers and pond builders who are struggling with tow straps and chains. The BOULDER BUDDY moves boulders safely and easily without damaging them and is easy to remove once the boulder is placed. Check out the video on our website to see how it works.

Tree Buddy

This is the material handling solution making the planting of B&B trees and other large root balled plants an absolute breeze! Using the same awesome design engineering that brought you The Boulder Buddy 4000, The Tree Buddy deploys in just seconds and requires just one machine operator and one ground labourer to plant trees weighing up to 3000 pounds. Check out the video on our website.

EZ Step Clamp Lift System

For More Information

The EZ step clamp can lift a maximum capacity of 600 lbs. with a maximum width of 28.5”. Perfect for lifting natural stone steps, curbing and large stone retaining walls.

Quick-E-Hammer

Visit Our Website
For Product Videos

Designed to rapidly install steel spikes in your Paver edging.

This tool has proven to decrease the amount of workman's comp. claims due to smashed fingers and hands. The muscle fatigue and energy saved with the use of the Quick-E-Hammer will not only make you more profitable but will also please your employees. The countersink design of the bit allows a 10" spike to be installed without causing the little bounce that loosens the spike and may cause the edging to fail. The Quick-E-Hammer is so easy to use, anyone on your payroll can use it and be far more productive. We recommend using any heavy duty, quality hammer drill that accepts an "SDS MAX" (sold separately).

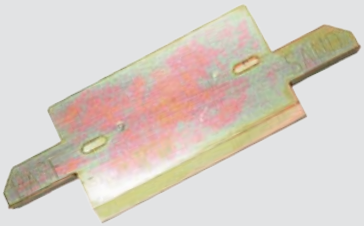
Quick-E-Screeder Package

Visit Our Website
For Product Videos

The Quick-E-Screeder Package includes a 3', 4 1/2', and 6' long screeder along with our adjustable Interchangeable Handle. The blades are made of durable lightweight aluminum. You will find it not only easy to use, but also a lot less stressful on your knees and back.

Quick-E-Gauge

Visit Our Website
For Product Videos



When it comes to installing pavers, accuracy is vital.

The use of a ruler to check gravel and sand depths often results in slightly different measurements along a single edge. The Quick-E-Gauge allows the installer to quickly, easily and perfectly set the height of the base or setting bed every time. The screeding edge of the Quick-E-Gauge is adjustable for the different thicknesses of pavers.

Quick-E-Lifter (Set of 2)

Visit Our Website
For Product Videos

By using one in each hand, these phenomenal tools allow one person to lift and transfer approximately 6 to 12 pavers quickly, efficiently and safely from the staging area pallets to the installation area.

Put our Quick-E-LIFTERS to the test. A user can carry more pavers at one time, with more ease than someone can by carrying a stack against their front. This translates into a hauler using a lot less energy and speeding up production by approximately 30%.

Keep your hands out of harm's way by using Quick-E-Lifters. You can almost throw your gloves away.

Quick-E-Scribes

Visit Our Website
For Product Videos

The Quick-E Scribes allows you to transfer a cut line from a fixed edge to a paver or retaining wall surface, swiftly and without error.

- Transcribes a marking line from any fixed object to a concrete product that needs to be cut in.
- Mark the properly sized retaining wall block or individual pieces of wall cap to make a perfect radius cap on your curved walls.
- Lightweight & portable - allows you to trace irregular shapes like natural rocks in order to perfectly incorporate them into a beautiful retaining wall.
- Quickly and perfectly scribe in a soldier or sailor row when the pavers are going to be against a hard fixed surface. This allows the pavers to then be cut in place, so the border pavers can simply be dropped into place for a perfect fit.
- Mark angles for perfectly mitered corners. There are 3 angles (90, 45 and 22½ degrees) engraved on the inside of one of the arms which can be tightened into place for consistent marking from paver to paver. Just trace the angle.

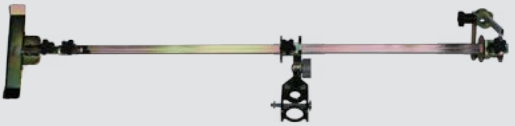
INSTRUCTIONS:

Adjust the two ends of the Quick-E-Scribes to the desired width, and just drag the guide end along the fixed edge that you wish to trace. The other end will follow and perfectly mark the paver or block for the cut. Watch the video online to see how to use the Quick-E-SCRIBES.

Professional Hardscape Tools

Quick-E-Tracer

Visit Our Website
For Product Videos



The task that used to take 2 or 3 labourers and a lot of flex pipe just got reduced to a one-person task and a simple walk along the path or walkway. The Quick-E-Tracer quickly duplicates a straight or curved line from one side of a walkway to the other.

NOTE: The Quick-E-Tracer accommodates Interchangeable Handle (sold separately).

Quick-E-Paver Popper

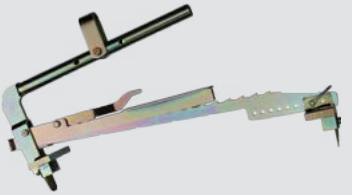
For Product Videos

Removing pavers after they have been installed properly can be a daunting task.

With the help of the Quick-E-PAVER POPPER it can definitely minimize a lot of that frustration. Its unique ratcheting system allows the tool to be adjusted from a 4” width to 24”, rapidly and effortlessly. Includes and extra set of replacement teeth.

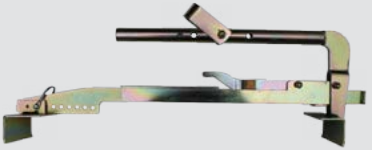


Professional Hardscape Tools

Quick-E-Slab

Visit Our Website
For Product Videos

Installing paver slabs can be a job that is hard on your back and hands.



The Quick-E-SLAB is a tool that can assist you in easing that grueling labor. For your convenience, we've added a loop to the Quick-E-SLAB that allows to use a loader or excavator to swing the slabs. With its unique ratcheting system, it can accommodate most slabs on the market today - up to a 24" wide.

Quick-E-Large Slab

- Pick up multiple size slabs
- Self-locking latch
- Built-in height adjuster to accommodate different slab heights
- Can be used with the Quick-E-Ergo Assist or with an excavator (sold separately)
- Helps alleviate back and hand strain
- Adjust easily from 17" - 43"
- Holds up to 480lbs.

Note: The slab in the photos is 30"x30" Techo-Bloc Travertina

Quick-E-Single Clamp BL 180

Visit Our Website
For Product Videos

The Quick-E-BL 180 efficiently moves a single wall block from pallet to setting bed or installation area.

It's perfect for gently and precisely setting the base course for a retaining wall. The clamp can be carried by hand or used with an excavator. Adjusts from 7" to 18" and holds up to 180 lbs.

Quick-E-Block Clamp BL 450

Visit Our Website
For Product Videos

The Quick-E-BL 450 can grab multiple blocks from your pallets just as they are delivered to the job site.

There is no need to shuffle block around to get it aligned. The Quick-E-Block Clamp is so user friendly. It adjusts quickly and easily. You and your workers will no longer suffer fatigue from hauling block. You'll come out looking like a hero! Clamp adjusts from 33" to 51" and holds up to 450 lbs.

Quick-E-BL 980

- Pick multiple cell blocks quickly & easily
- Move step treads front to back with minimal effort
- Adjusts quickly & easily
- Substancial labor savings
- Adjusts from 0"-38"
- Holds up to 980lbs

2 Unique attachments are available for special applications.

BL 980 Clamp Attachments

Quick-E-Wedge

Keeps tapered block straight when picking them with our Block Clamps.

Quick-E-I Spacer

Made to grab more than 1 "I" shaped block straight.

The Retaining Wall block used in the photo is Allan Block, Vertical.

Quick-E-Large Block Clamp - BL 1800

The ultimate tool for picking step treads, slabs and wall material.

Can pick product from front to back, or up to 4' end to end. Clamp adjusts from 9"- 48" and holds up to 1,800 lbs.

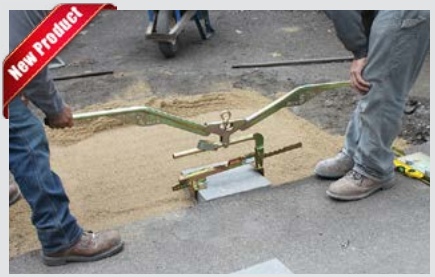
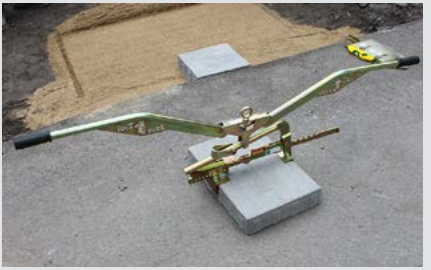
Quick-E-Ergo Assist

Visit Our Website
For Product Videos





Helps ease the grueling task of installing heavy block and slabs.

Quickly attaches to: Quick-E-Slab, Quick-E-Large Slab and Quick-E-Single Clamp BL 180. Note: the above clamps are sold separately.

Quick-E-Grade-Rake

The Quick-E-Grade Rake is 36” wide and made of light-weight, durable extruded aluminum alloy. It is easy to clean and has a powder coated handle. The double-sided blade has one serrated edge. Keeps aggregate from separating.

Quick-E-Wall Screed

Visit Our Website
For Product Videos

Prepare 15’ of retaining wall gravel base at a time.

The Quick-E-Wall Screed tool may be better described as a retaining wall installation system. The tool’s simple construction makes preparing a 15’ length of base a very simple task.

The purpose of the Quick-E-Wall Screed system is to prepare a perfectly level base quickly and efficiently - each and every time. The four screed pipes are connected to each other by 5’ lengths of chain. This keeps them the optimal distance apart for using the Quick-E-Screeder and Handle. The chain is used as an offset or layout guide for the wall being built.

For Product Videos

The contractors choice for cleaning equipment tracks. Open ended shovel with a tight pointed end for getting into tight spots.

Quick-E-Sand Plow

Visit Our Website
For Product Videos

One of the biggest reasons a project can fail is an improperly installed edge restraint (PVC edging).

If your edging does not sit down tight on your compacted gravel base, the sand will migrate out and cause your edge to lose all stability. Thus causing the installation to fail. The Quick-E-Sand Plow effortlessly glides along the top of your paver edge while plowing the sand out away from the paver allowing a perfect setting bed on the gravel for the PVC edging.

NOTE: this tool accommodates the interchangeable handle (sold separately).

To use the Quick-E-Sand Plow simply loosen the two large black knobs and slide the plate up or down until the desired paver height (in millimeters) is lined up with the top of the plate. By doing this, you will automatically be set to the correct height if you are using 1” screed pipes. Once set, firmly drag the Quick-E-Sand Plow along the edge of your paver surface to plow the sand away and expose the compacted gravel below. This prepares a perfect base on which the PVC edging is to rest and get spiked into. Be sure to keep the plow firmly against the paver edge at all times. Calibrated for depths from 2-3/4” to 6” (7 cm to 15 cm).

Quick-E-Tumbler

Visit Our Website
For Product Videos

Use the same technology as the manufacturing plant, to age your snapped pavers and retaining wall block.

When snapping a tumbled product, it is difficult to simulate the same look achieved in the factory. That so desired old world effect. This tool uses the same aging process as the factory, but in a compact and portable unit.

Simply insert the hex shaft into any ½" chuck drill. Using a moderate speed, run the Quick-E-Tumbler over the block until the desired tumbled look is achieved. The Quick-E-Tumbler also works well when removing glue from existing caps or block.

To be used with a 1/2" chuck drill (not included). Safety glasses should be worn at all times.

Quick-E-Paver Pad

Visit Our Website
For Product Videos

Protect your pavers from being scuffed and marred by the steel plate of your compactor. This polyurethane Paver Pad attaches to your machine with minimal fabrication. Includes attachment plate and two bolts for fastening to compactor. Fits most compactors. Dimensions are 19 X 24.

Interchangeable Handle

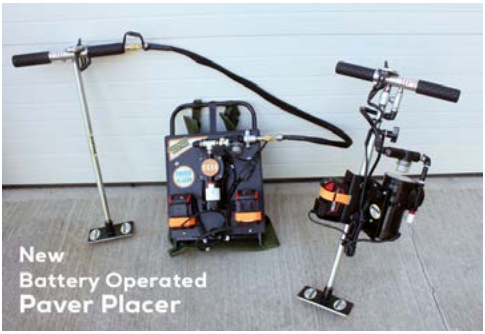
Visit Our Website
For Product Videos

The Interchangeable Handle uses a simple pull pin to quickly connect it to the Quick-E-Sand Plow, Quick-E-Screeder and Quick-E-Tracer. It is light weight and extend-able.

Stone Lifting Suction Equipment

Introducing the Paver Placer®

PAVE MOR suction equipment is a trusted brand in the United States and Great North Landscape Products has now partnered with them in Canada. The Pavemor line of suction equipment grew, as an extension, of pneumatic equipment for the nursery and seeding industry.



Whether your company is looking for a 1 person or 2 person unit, PAVEMOR has a design for you.

The PM 3AIR is the most popular unit, identifiable by its blue paint and versatility. With 2 employees and a compressor, you can lift up to 240 lbs (109 kgs). The PM 1AIR is a 1 person unit that can be used to pick up pavers or slabs up to 70 lbs (32 kgs).

The newest addition to the Paver Placer line, is the PM 4AIR. It is a lighter duty system, that comes with a H-handle and a T-handle, allowing your crew the versatility of having both units on the same job. The H-handle and the T-handle can lift 130 lbs (59 kgs).

All PAVEMOR models are made from stainless steel with a durable silicone suction seal.

Stone Lifting Suction Equipment

Model PM 1AIR - 1 Person

- Up to 70 lbs lift capacity
- Includes two handles for one or two person use
- Cuts install time by one third or more with fewer injuries
- Vacuum pick up with “venturi”
- Operates using standard compressors available from most hardware supply stores
- Simple operation by pressing the lever down to pick up a paver, then releasing the lever once the paver is in place
- Four sizes of vacuum pipe are available: 6”, 12”, 18” and 24”
- Industrial male quick connect, 2 feet of heavy-duty vacuum pick up with galvanized pipe for long life

Model PM 3AIR - 2 Person

- Up to 240 lbs lift capacity
- Full size two person lifting handle
- Two high capacity vacuum generators
- Comes with “Big Foot” 12” x 12” foam head, capable of lifting both smooth and rough surface stone
- Head is constructed with heavy duty plate steel
- Operates using standard compressors available from most hardware supply stores
- Simple operation by pressing the lever down to pick up a paver, then releasing the lever once the paver is in place
- A complete line of interchangeable heads are available in different sizes, for lifting various types and sizes of materials
- Four sizes of vacuum pipe are available: 6”, 12”, 18” and 24”
- Vertically adjust and swing to 180 degree’s for easy transport
- One year limited warranty

Stone Lifting Suction Equipment

Model PM 4AIR - 1 & 2 Person

- Up to 70 lbs and 130 lbs lift capacity
- Full size two person lifting handle
- Two high capacity vacuum generators
- Comes with “Big Foot” 12” x 12” foam head, capable of lifting both smooth and rough surface stone
- Head is constructed with heavy duty plate steel
- Operates using standard compressors available from most hardware supply stores
- Simple operation by pressing the lever down to pick up a paver, then releasing the lever once the paver is in place
- A complete line of interchangable heads are available in different sizes, for lifting various types and sizes of materials.
- Four sizes of vacuum pipe are available: 6”, 12”, 18” and 24”
- Vertically adjust and swing to 180 degree’s for easy transport
- One year limited warranty

Model PM 5AIR
RED HOOK™

- For excavators, back hoes and forklifts
- Single venturi
- Up to 130 lbs lift capacity

Pave Mor® Accessories

We have a complete line of spare parts and accessories available for all Pave Mor™ units.

Suggested Compressors

For PM 1AIR

Makita MAC5200 Big Bore 3.0 HP Air Compressor,

115 volts, 6.5 CFM at 90 PSI, with folding handle and wheels.

For 3 or 4 AIR

Makita MAC5501 Big Bore 5.5 HP Gas,

12.5 CFM at 100PSI, tank capacity 10 gals., max. pressure 135 PSI.

These are suggested models only, other units with comparable ratings are suitable.
